Mike Cima, PhD

Public Health Preparedness Epidemiologists

During the flu season the Arkansas Department of Health (ADH) produces a Weekly Influenza Report for clinicians. The report provides information on flu activity in the state. The report also compares influenza like illness (ILI) in Arkansas to activity in the U.S. ADH receives reports of only a fraction of flu cases. Therefore, it is important to understand that the information in the weekly update is representative of the timing and location of activity, but it does not reflect the overall burden of disease. It is presumed that there are many more people actually affected than the report shows. Clinicians and policy makers may find the report helpful in terms of communicating to colleagues and patients about the current status of the flu season.

Report Key Points:

- For Week 2, Arkansas reported “Widespread” activity to the Centers for Disease Control and Prevention (CDC) for geographic spread of influenza, and “High” or 10/10 for ILI intensity.
- Since October 1, 2017, over 22,000 positive influenza tests have been reported to the ADH online database by health care providers. In Week 2, 73 counties reported influenza cases. The majority of reports came from Benton, Craighead, Faulkner, Pulaski, Washington, White, Sebastian, Jefferson, Independence, Crawford, Yell, Saline, Franklin, Pope, Greene, Baxter, and Lonoke.
- Among flu antigen tests that can distinguish between influenza A and B virus types, 74 percent were influenza A, and 26 percent were influenza B.
- There were 484 positive PCR flu tests last week from private labs: 352 influenza A, and 127 influenza B; 3 positive influenza A subtype H3N2 and 1 positive influenza A subtype H1N1, 1 sample was Unsubtypeable. There were 2 positive influenza A subtype H3N2, 2 positive influenza A subtype H1N1, and 1 positive influenza B subtype Yamagata from the ADH lab; 1 sample tested negative for influenza this week.
- About 7.0 percent of patients visiting emergency rooms last week were there for ILI. About 10.1 percent of outpatient visits were for ILI.
- The average school absenteeism rate last week was 7.45 percent among public schools.
- To date, 49 influenza-related deaths have been reported in Arkansas this flu season, 48 among adult persons and 1 pediatric death.
- Since October 1, 2017, 41 facilities including 32 nursing homes have reported influenza outbreaks.
- The proportion of deaths reported to the National Center for Health Statistics attributed to pneumonia and influenza (P&I) was at the system-specific epidemic threshold.
- For Week 1, the geographic spread of influenza was reported as widespread in 49 states, Guam and 1 state reported regional activity, the District of Columbia reported local activity, the U.S. Virgin Islands reported sporadic activities, and Puerto Rico did not report.
- You can report flu year-round and view the weekly influenza report during the influenza season at: <http://www.healthy.arkansas.gov/programs-services/topics/influenza>.
You can also access the reporting website directly at: <https://FluReport.ADH.Arkansas.gov>

Death Report for Week 2

- Deaths from all causes: 877
- Deaths due to Pneumonia: 96
- PCR confirmed Flu Deaths: 1
- Death Certificate or Flu Antigen only: 12

Cumulative Flu Deaths since 10/01/2017

- PCR confirmed Flu deaths: 10
- Death Certificate or Flu Antigen only: 39
- Cumulative Flu deaths: 49

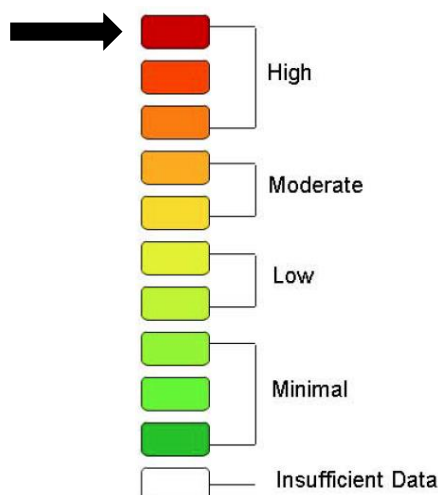

ER Visits

- **Week Ending: 01/13/2018**
Weighted Average: 7.0%
– Total Visits: 13,154
– Visits with ILI: 919
- **Previous Week**
Weighted Average: 6.6%
– Total Visits: 22,607
– Visits with ILI: 1,482

Total Flu-Related Hospital Admissions

- **PCR Confirmed:**
– Cumulative: 368
– Week ending 01/13/2018: 67
- **Antigen Positive:**
– Cumulative: 823
– Week ending 01/13/2018: 99

Weekly Arkansas ILI Intensity Level Reported by Sentinel Providers

PCR Lab Confirmed Influenza

- Total Cases since 10/01/2017: 2,196
- Week Ending 01/13/2018: 489

PCR Tests	ADH Lab Week 2	Other Labs Week 2	Cumulative Cases Since 10/01/2017
A+	0	352	1,598
B+	0	127	448
B/Victoria	0	0	0
B/ Yamagata	1	0	11
H1N1+	2	1	14
H3+	2	3	119
Unsubtypeable	0	1	6
Total	5	484	2,196
Negative	1	--	--

PCR Confirmed Influenza Cases since 10/01/2017

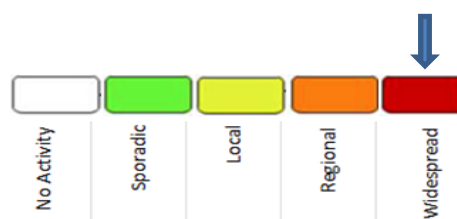

Age Groups	PCR+	Hospitalized	Deaths
0-4 yr.	213	18	0
5-18 yr.	573	19	1
19-24 yr.	118	6	0
25-44 yr.	287	10	0
45-64 yr.	413	85	1
>= 65 yr.	590	230	8
Unknown	2	0	0
Total	2,196	368	10

School Absenteeism*

Week Ending: 01/13/2018
 - Percent Absent: 7.45
 - Previous Week: 8.77

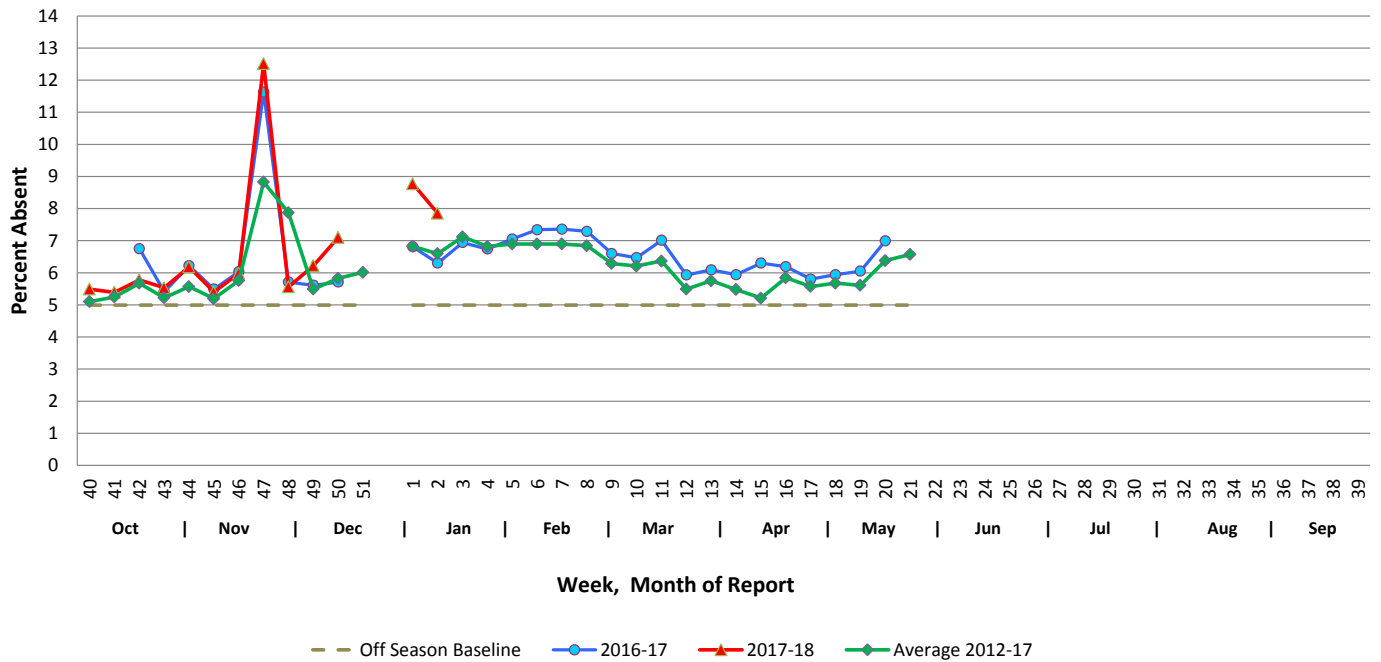

* Average daily absenteeism for all public schools during this reporting week.
